

Nolij Web 6.7 Upgrade

There are a few changes in Nolij Web from version 6.6 to version 6.7.

- 1 The first time you login, select a view from the Workflow/View tool. :
- 2 The Clear Query Fields tool has moved from the main toolbar to the Workflow header and is changed in appearance. This tool is used to clear the search criteria, such as EmplID or Last Name and First Name.

---------------	----------
- 4 The locked file or folder message displays on the Folder Objects (document list) header.
- 5 The System and System Objects area are combined into one area called the File Explorer. Click on the Expand tool to locate a file stored on your computer that needs to be copied to a folder in Nolij.
